1. About ONYX

BOOX is presented by Onyx International, which has a group of professionals

Copyright © 2019 Onyx International. All rights reserved.

who dedicate themselves in designing state-of-the-art reading terminal. The beauty of the BOOX is embodied in both its simplicity and its power. As we are going to show you, BOOX is an open and flexible platform for both consumers and content providers.

BOOX is powered by a 16-level grayscale e-ink screen that looks and feels like paper. Passive lighting and diffuse surface relax your eyes and reduce eye strain. By the hand-writing system, you can take notes while reading and sketch up ideas that happen to emerge. BOOX takes full advantage of new-generation e-ink screens: extremely low power consumption without reflection and backlight. Each full charge can sustain a few weeks' reading. By reducing paper consumption while providing a realistic paper-like reading experience, digital content helps to protect the environment without sacrificing convenience or lifestyle.

For content partners, we also provide support for custom formats and digital rights management solutions. All of our viewers have standard features such as layout management, font adjustment, full-text-search, zooming, and page flow.

Copyright © 2019 Onyx International. All rights reserved.

For a next-generation information device, connectivity is essential. The user can connect to the Internet by built-in Wi-Fi, 3G module or other add-on modules to download new content or surf the web. Customized for the e-ink screen, WebKit, the same software engine as some powerful desktop browsers such as Safari and Chrome, is the web browser of BOOX.

BOOX gives you a new reading experience.

No stylus for Nova, handwriting unsupported.

The following * means it is only for Nova Pro.

3. Safety Guide

Please read the Safety Guide carefully before you start to use the device. Contact your BOOX retailer if you have any technical problem, or you can dial our official service line at 4008-400-014 or 4008-860-830.

Copyright © 2019 Onyx International. All rights reserved.

Screen protection

The device is equipped with E-ink screen, which is very fragile. Please have no shocking, squeezing, pressing against the screen, or dropping the device from a higher place. If the screen is already broken, stop using it and contact the professional or other qualified staff to replace the screen for you. Please don't dismantle the device without our permission.

Standard accessories

Only the battery, adapter, and other accessories meeting our standard safety rules can be used for the device. For details, please refer to Product Specification. We will not be responsible for any damage caused by incompatible accessories.

Stay away from liquids

Copyright © 2019 Onyx International. All rights reserved.

The device is not waterproof. Don’t expose the device to a humid environment or use it in the rain. Please keep it away from any corrosive liquids.

Don’t dismantle the device

Please don’t dismantle the device in case of any damage.

Using environment

The using environment of the device is 0°C-50°C.

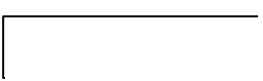
5. Main Interface

The main interface contains a status bar, content area, and function area.

The function area contains certain modules.

Double click the icons in function area can return to the main page of the specified module.



Content Area

Copyright © 2019 Onyx International. All rights reserved.

(1) Status bar

This section displays the current state of the device, including Home, Battery

Copyright © 2019 Onyx International. All rights reserved.

Status, Notification, Time, Front Light on/off, Hand Touch on/off, A2 Mode on/off, Multi-tasking switching.

Home

Go back to the homepage of the Library directly.

A2 Mode

Two-grey level refreshment mode is good for a fast refreshment of text pages. It enables fast pageturn, no screen flashing and less ghosting background. When A2 mode is on, reading articles with images, graphics, texts mixed are not recommended because the images may not be fully shown.

A2 Mode is on

A2 Mode is off

Copyright © 2019 Onyx International. All rights reserved.

Switch between Pageturn / volume

In third-party apps, this indicated button is set as pageturn function by default for the pre-installed application of the device.

Front Light

Call out a panel to adjust front light luminance.

Hand Touch

For palm rejection, hand touch can be turned off (except for the status bar). The default hand touch is on after reboot.

Multi-tasking switching

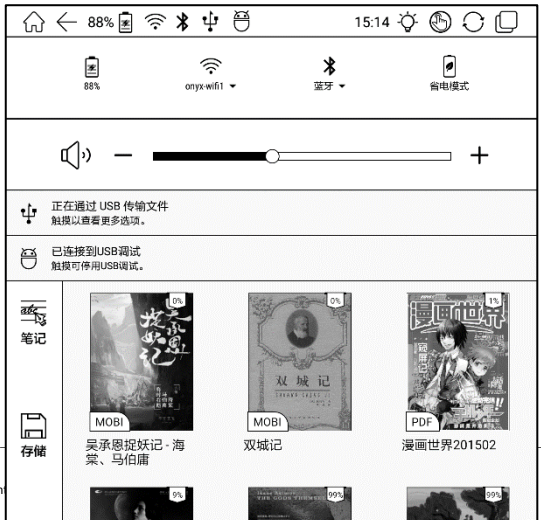
Clicking this icon, pop up the Android multi-task list to check the running

Copyright © 2019 Onyx International. All rights reserved.

applications in the background, one key to clear up all the applications to speed up the device.

Notification Interface

Click the middle of the Status Bar, the notification interface can be callout. Notification interface contains battery percentage, WIFI setting, Bluetooth setting, power saving mode, volume adjustment, ongoing operation indication, etc.



Battery Status

It shows the current state of the battery including remaining capacity, use hour, the curve of the battery percentage.

Copyright © 2019 Onyx International. All rights reserved.

WIFI Setting

When using at the first time, you should enter into the Wi-Fi setting interface to get a possible connection. Then click the icon to turn on/off the automatical connection.

Bluetooth Setting

When using at the first time, you should enter into the Bluetooth setting interface to match a device you want. Then click the icon to turn on/off the automatical Bluetooth connection.

Power Saving Mode

Prohibit third-party software from running in the background. Help to save power of the device.

Copyright © 2019 Onyx International. All rights reserved.

Volume Adjustment

Adjust the volume of a loudspeaker or bluetooth earphone, only for the devices without volume buttons.

(2) Function Area

The function area includes Library, Shop, Storage, Apps, and Settings.

(3) Content Area

The contents are sort by time by default. The contents are:

Library

All books in supported format from internal storage are displayed here. The scanning path can be modified at Settings - Library Settings.

Storage

Copyright © 2019 Onyx International. All rights reserved.

All folders from internal storage will be displayed here. Users can manage documents and folders from the page.

Apps

All the third-party apps are displayed here. Users are allowed to manage or optimize the apps.

Settings

The list of system settings helps to manage the device.

6. Library

The library only displays E-book documents in supported formats in the storage.

Copyright © 2019 Onyx International. All rights reserved.

Book cover thumbnail is displayed by default. E-books are sorted by the creation time.

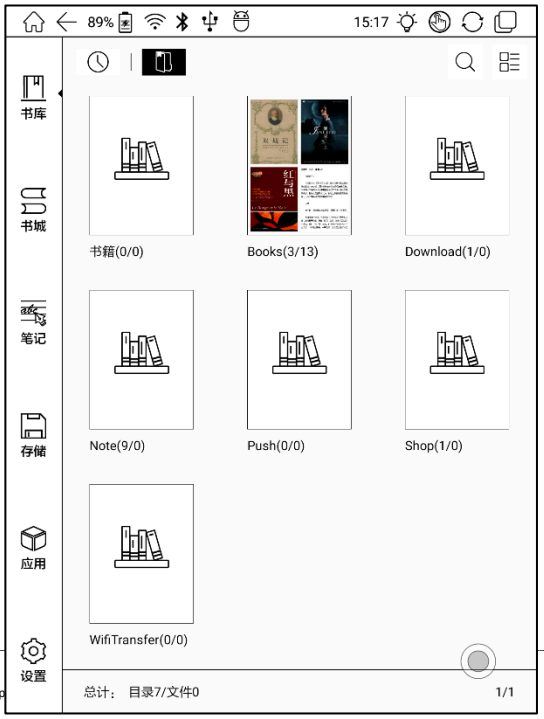
Tapping the toolbar icon on the top right of the library, users can Search, Create sub-library, Multi-select, Filter & Sort by, and Rebuild Library.

Copyright © 2019 Onyx International. All rights reserved.

Library Display Switch

Click on these icons to switch the library display. By default, it automatically scans and loads all the supported documents in the specified path, sorted by a specified way.

Another one is to display the content based on the structure of storage. The icons change after clicking on.



Filter & Sort

Navigation Ball is a circular ball that floats above all the apps on the screen. 5 buttons can be customized.

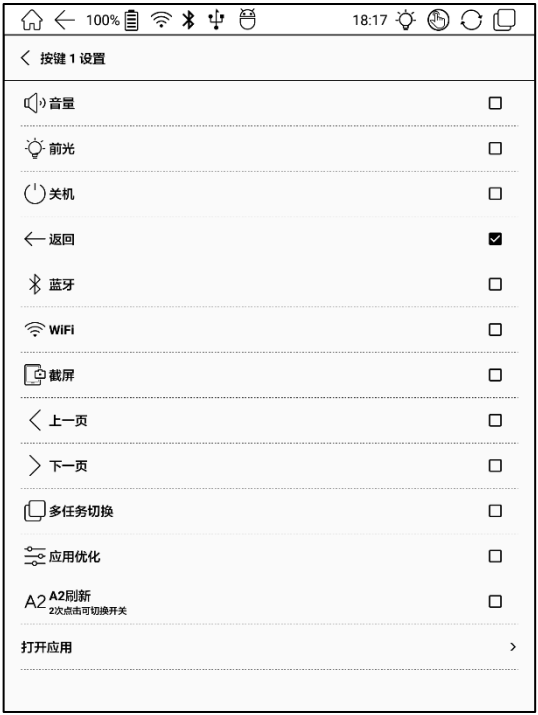
Copyright © 2019 Onyx International. All rights reserved.

Single click on the ball to expand and collect navigation menu.

It requires to turn off and on again after the new button settings.

Copyright © 2019 Onyx International. All rights reserved.

The 5 buttons can be set as multiple common functions including system operation, app switching, app optimization and so on.



Copyright © 2019 Onyx International. All rights reserved.

The app optimization can be called out in an app through the Navigation Ball, for real-time review after optimization (DPI setting requires app restart)

Copyright © 2019 Onyx International. All rights reserved.

Copyright © 2019 Onyx International. All rights reserved.

App Optimization Callout through Navigation Ball

The optimization is the same as the one by long press on app icons.

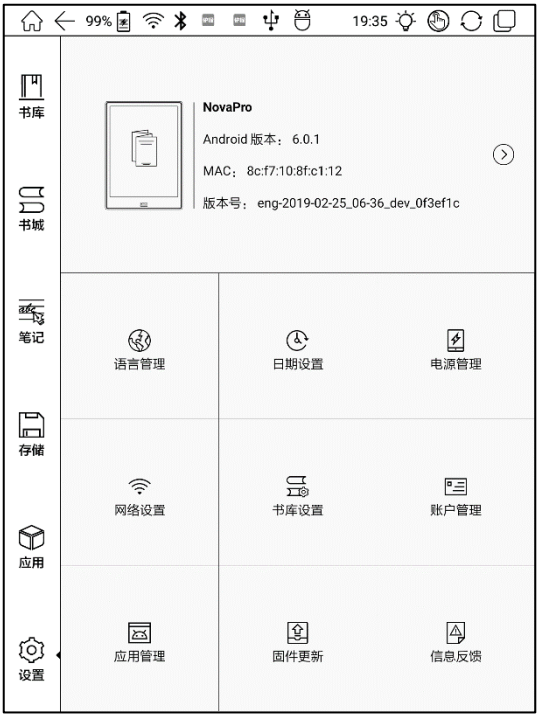
The settings are synchronized.

Copyright © 2019 Onyx International. All rights reserved.

12. Settings

It contains product model, Android version, MAC address and firmware version in this page. Users can manage settings of the whole device here and click the device picture for an online user manual.

Copyright © 2019 Onyx International. All rights reserved.



About Device

Click the model number for more information about the device, including

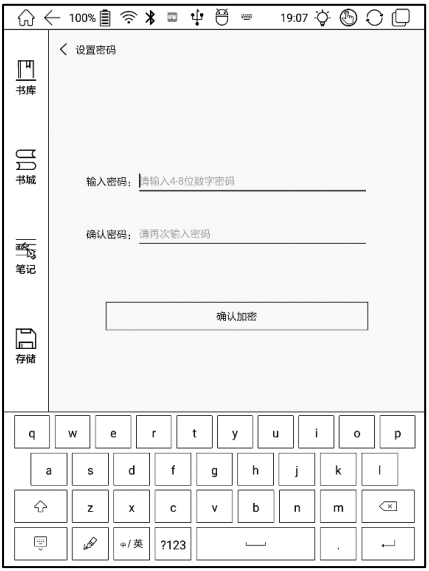
Copyright © 2019 Onyx International. All rights reserved.

Capacitive Touch Version, VCom, Other information, Screen Lock Password and Factory Reset.

Copyright © 2019 Onyx International. All rights reserved.

Screen Lock Password requires 4-8 digital numbers.

Temporarily no password retrieve. Please keep the password and make sure the email address is valid. In the case of losing the password, the device gets a deadlock as our company does not store any private password for users. This device needs to be cleared up and reset by sending back to the factory.



Copyright © 2019 Onyx International. All rights reserved.

Note: To run the function of factory reset removes all of the user data. Please make a data backup.

Language setting

Users can set system language, TTS reading, dictionary and etc.

Copyright © 2019 Onyx International. All rights reserved.

Users can set languages of the system and virtue keyboard. The system has an Android keyboard by default. Users can install third-party apps for more input methods.

Date & Time

Users can choose either auto setting or manual setting for date and time. When the device is connected with the Internet, it will automatically set date and time according to the local time zone. Manual setting requires to set time zone, date and time.

Copyright © 2019 Onyx International. All rights reserved.

Users can select their preferred time and date display format.

Power

Users can set screen auto sleep timeout, power off timeout, network inactivity timeout, etc.

Network

This is for Wi-Fi / VPN / Bluetooth setting.

When Wi-Fi is connected, users can browse webs and download books via the internet on the device.

WiFi Setting

When turning WiFi on, the device will search Wi-Fi hotspots automatically. When all available WLAN are listed, users can choose a network, input password to connect with the internet. WiFi signal will be displayed at “Status

bar” when WiFi is connected.

After WIFI is connected successfully at the first time, the device will save WI-FI information automatically. Users only need to turn on WIFI on notification bar if using the same WIFI next time.

Bluetooth Setting

Turn on Bluetooth, you can search for nearby Bluetooth devices and send connection requests. Bluetooth needs to be paired first.

Currently it only supports the eReader to receive documents, not available to other devices.

VPN Setting

When the VPN is turned on for the first time, the system requires to set a password. This password needs to be used for screen unlock or when the factory settings are restored.

Library Setting

Users can choose to scan specified directory in storage, the default scanned files are Books, hop, Wifi Transfer and Push.

When clicking the “Scan whole storage” would scan all the files including system or app log, which may slow down the library loading speed.

Users could set the title display mode through checking the option of “show books’ titles instead of their names in library”, and books’ names are shown by default.

Account management

All accounts related data sync and push can be managed here, not including the third-party accounts.
